

ProtectPro Technology

Manual Smart Defenders

General Information

All Smart Defenders (SD) come with a 10 year limited warranty, which does not cover inappropriate handling or abuse. SD products can not be exposed to the weather.

The SD are quantum physic computers which know no left or right, back or front, or up or down.

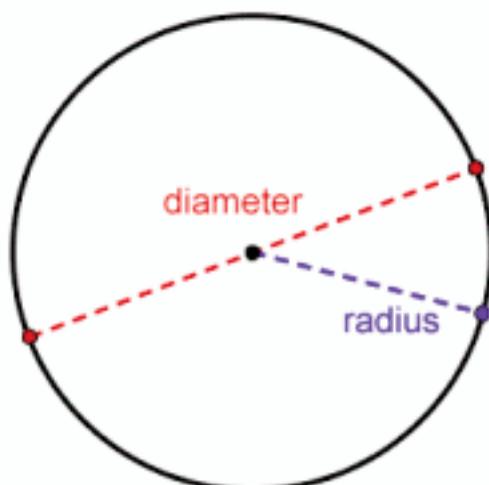

So consequently it does not matter how you place the units in perspective to the objects to be protected. Please visit for details: <https://protectpro.net/5g-smart-defenders/>

SD 1 Human Protect

The SD 1 covers an area of 5 meters or 15 feet in radius and 10 meters and 30 feet feet in diameter which covers in a sphere as well. The hole in the product allows for attaching it to a key chain, as a pendant etc.. and of course you may wear it in your pocket and bag as well. As long you dwell within 15 feet from the SD 1 you will be covered.

SD 2 Food Protect

The SD 2 covers food and beverages in an area of 10 meters or 30 feet in radius and 20 meters or 60 feet in a diameter which covers in a sphere as well. The hole in the product allows for attaching it to a key chain and of course you may wear it in your pocket and in a bag as well when leaving home to eat out. Placing it somewhere in the kitchen will not only cover all products in the given space as specified above, but covers as well all products sitting in a fridge and in a deep freezer within that space. The construction of the fridge and freezer can not stop the technology from working efficiently.

Manual Smart Defenders

Following products protect from electromagnetic radiation like Wi-Fi, GPS, transmission towers, computer screens and much more. Please visit our website for more details.

SD 9-5 Protection from 5G electromagnetic radiation

The SD 9-5 aka as SD 5 protects a coverage area of 5 meters or 15 feet in radius, and 10 meters or 30 feet in diameter which covers in a sphere as well. The hole in the product allows for attaching it to a key chain, wear it as a pendant, and of course you may wear it in your pocket, or in a bag. The main application for the SD 9-5 is the mobile use once you leave your home, go shopping, go to restaurants, you travel, go on vacation, add to school bags etc. It is important to take the SD 9-5 along in cars, trains, buses and on the airplane. If you can not afford the SD 9-50 to protect your entire home you can work with the SD 9-5 by carrying it on you, or have it close to you all day long, and have it at night close to your bed as long it is not more than 15 feet away from you.

SD 9-10 Protection from 5G electromagnetic radiation

The SD 9-10 aka as SD 10 protects a coverage area of 10 meters or 30 feet in radius and 20 meters or 60 feet in diameter which covers in a sphere as well. The SD 9-10 is still small and light weighted enough to wear it in your pocket or in a bag. The main applications for the SD 9-10 is the use in office space / work space and small apartments. Simply place the SD anywhere within the area you want to protect and make sure you keep the coverage according to the measurements as above in mind. If your place is larger than the coverage by the SD 9-10 and you can not afford the SD 9-50 to protect your entire home you can work with the SD 9-10 by carrying it on you or having it close to you all day long and have it at night close to your bed as long it is not more than 30 feet away from you.

SD 9-50 Protection from 5G electromagnetic radiation

The SD 9-50 aka as SD 50 protects a coverage area of 50 meters or 150 feet in radius and 100 meters or 300 feet in diameter which covers in a sphere as well. The main application for the SD 9-50 is to protect an entire house complex, larger apartments, and office space / work space. Simply place the SD anywhere within the area you want to protect and make sure you keep the coverage according to the measurements as above in mind.
