Norbert Heuser

CEO

IPC USA CORP

Reverse Osmosis RO

Osmosis means
the concentration balance
between two liquids through
a selectively permeable membrane.

This results in an uneven amount of water
on both sides of the membrane.

I will explain my reasons and opinions
why I oppose to
Reverse Osmosis Technology
and in consequence
Reverse Osmosis Water
in the following pages.

Reason 1
Not God Given

RO water
is not natural.

RO water does not
exist in nature.

Reason 2
Military Use

Reverse Osmosis technology / water was not originally designed
for human consumption but for
military use only
and later for industrial use.

Reason 3
Waste of Water

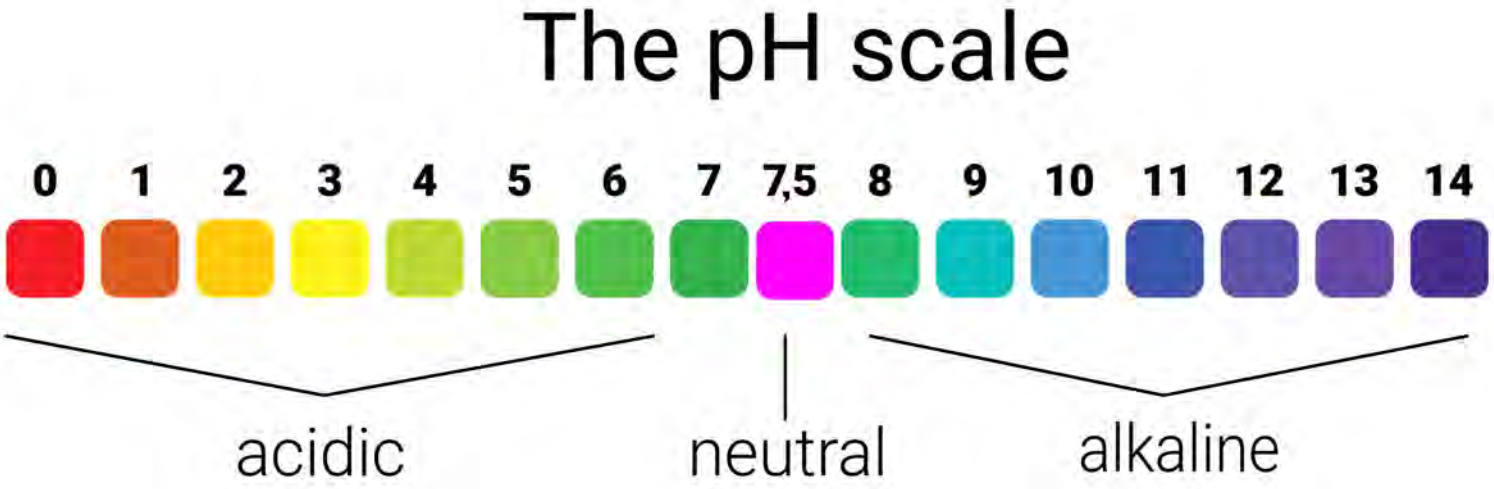
For each gallon of
RO water produced
you dump out
up to 3 gallons
of water or more.
Crazy waste
crazy cost.

Reason 4
Acidity

Healthy water has a pH level
between pH7 and pH8 ideally pH7.5
RO water is way too acidic.
Acidity is unhealthy.

Typically, RO water has a pH
between pH 5.5 and pH 6.5
which means it is
10 to 100 times too acidic.

The worst acidic RO water
I come across was
ph 4.5 which means
1000 times too acidic.



ph Scale

acidic

alkaline

1,000,000 x	100,000 x	10,000 x	1,000 x	100 x	10 x	**neutral**	10 x	100 x	1,000 x	10,000 x	100,000 x	1,000,000 x
1.5	2.5	3.5	4.5	5.5	6.5	**7.5**	8.5	9.5	10.5	11.5	12.5	13.5

Vinegar Good Water Soap

acidic

1,000,000 x	100,000 x	10,000 x	1,000 x	100 x	10 x	**neutral**
1.5	2.5	3.5	4.5	5.5	6.5	**7.5**

Vinegar

Good Water

alkaline

10 x	100 x	1,000 x	10,000 x	100,000 x	1,000,000 x
8.5	9.5	10.5	11.5	12.5	13.5

Soap

Typical acidity range of reverse osmosis water.

pH	**7.5**	**neutral**	
pH	**6.5**	**10 x**	too acidic
pH	**5.5**	**100 x**	too acidic
pH	**4.5**	**1,000 x**	too acidic
pH	**3.5**	**10,000 x**	too acidic
pH	**2.5**	**100,000 x**	too acidic
pH	**1.5**	**1,000,000 x**	too acidic

Healthy Water should have a
pH of 7 - 8 ideally around pH 7.5.
It should be neither
acidic nor alkaline.

pH	**11.5**	**10,000 x**	**too alkaline**
pH	**10.5**	**1,000 x**	**too alkaline**
pH	**9.5**	**100 x**	**too alkaline**
pH	**8.5**	**10 x**	**too alkaline**
pH	**7.5**	**neutral**

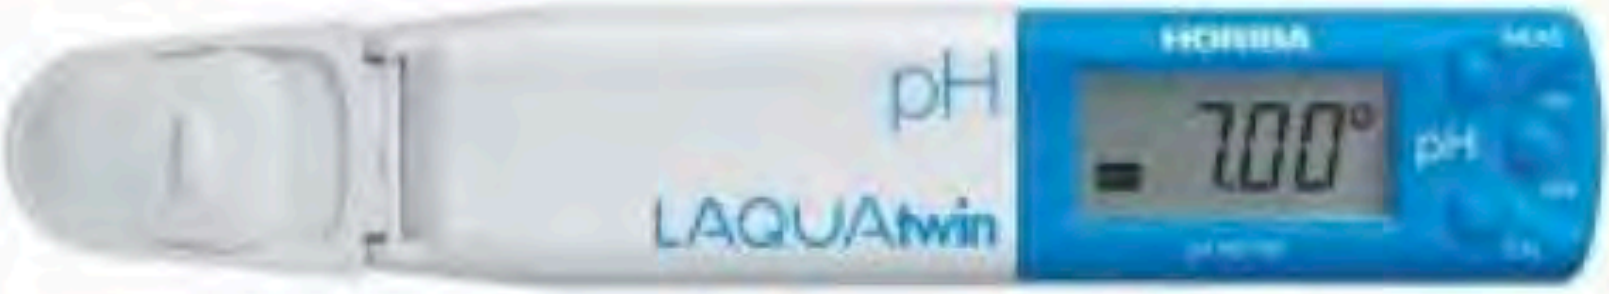
100,000-times too acidic	2.4	COCA COLA		
100,000-times too acidic	2.4	PEPSI COLA		
100,000 - 1 mill times too acidic	1.9	DRAGON FRUIT, Starbucks, fruit drink		

Typical waterfilling station in a healthfood store - of course it is “healthy” reverse osmosis water.



pH test device, liquids

pH test device, solids

Reason 5
Hungry Water

The RO filter removes everything in the water including any toxins
but also all minerals that we need.

This water is also called
"hungry water".
The moment the RO water enters the body, it attracts all the badly needed minerals in the body, wherever they sit, like a magnet.

This means that RO water brings
Absolutely no minerals into the body
(what healthy water does)
but RO water also deprives the body
of the important minerals it needs.

The Mineral Water and Beverage Mafia

Only available in German unfortunately not in English.

Reason 6
Fungus

Fungus can grow both in the membrane as well in the object itself because of RO water. The fungus may well end up with the water in your body.

Here is a quote from the "Mafia" book:

... Another risk source is the risk of bacterial contamination of the membrane, which independent tests repeatedly detect .....

When watering plants with RO water fungus may grow and may effect the plants.

Reason 7
Membrane

To filter out all substances from the water the water passes through a membrane.

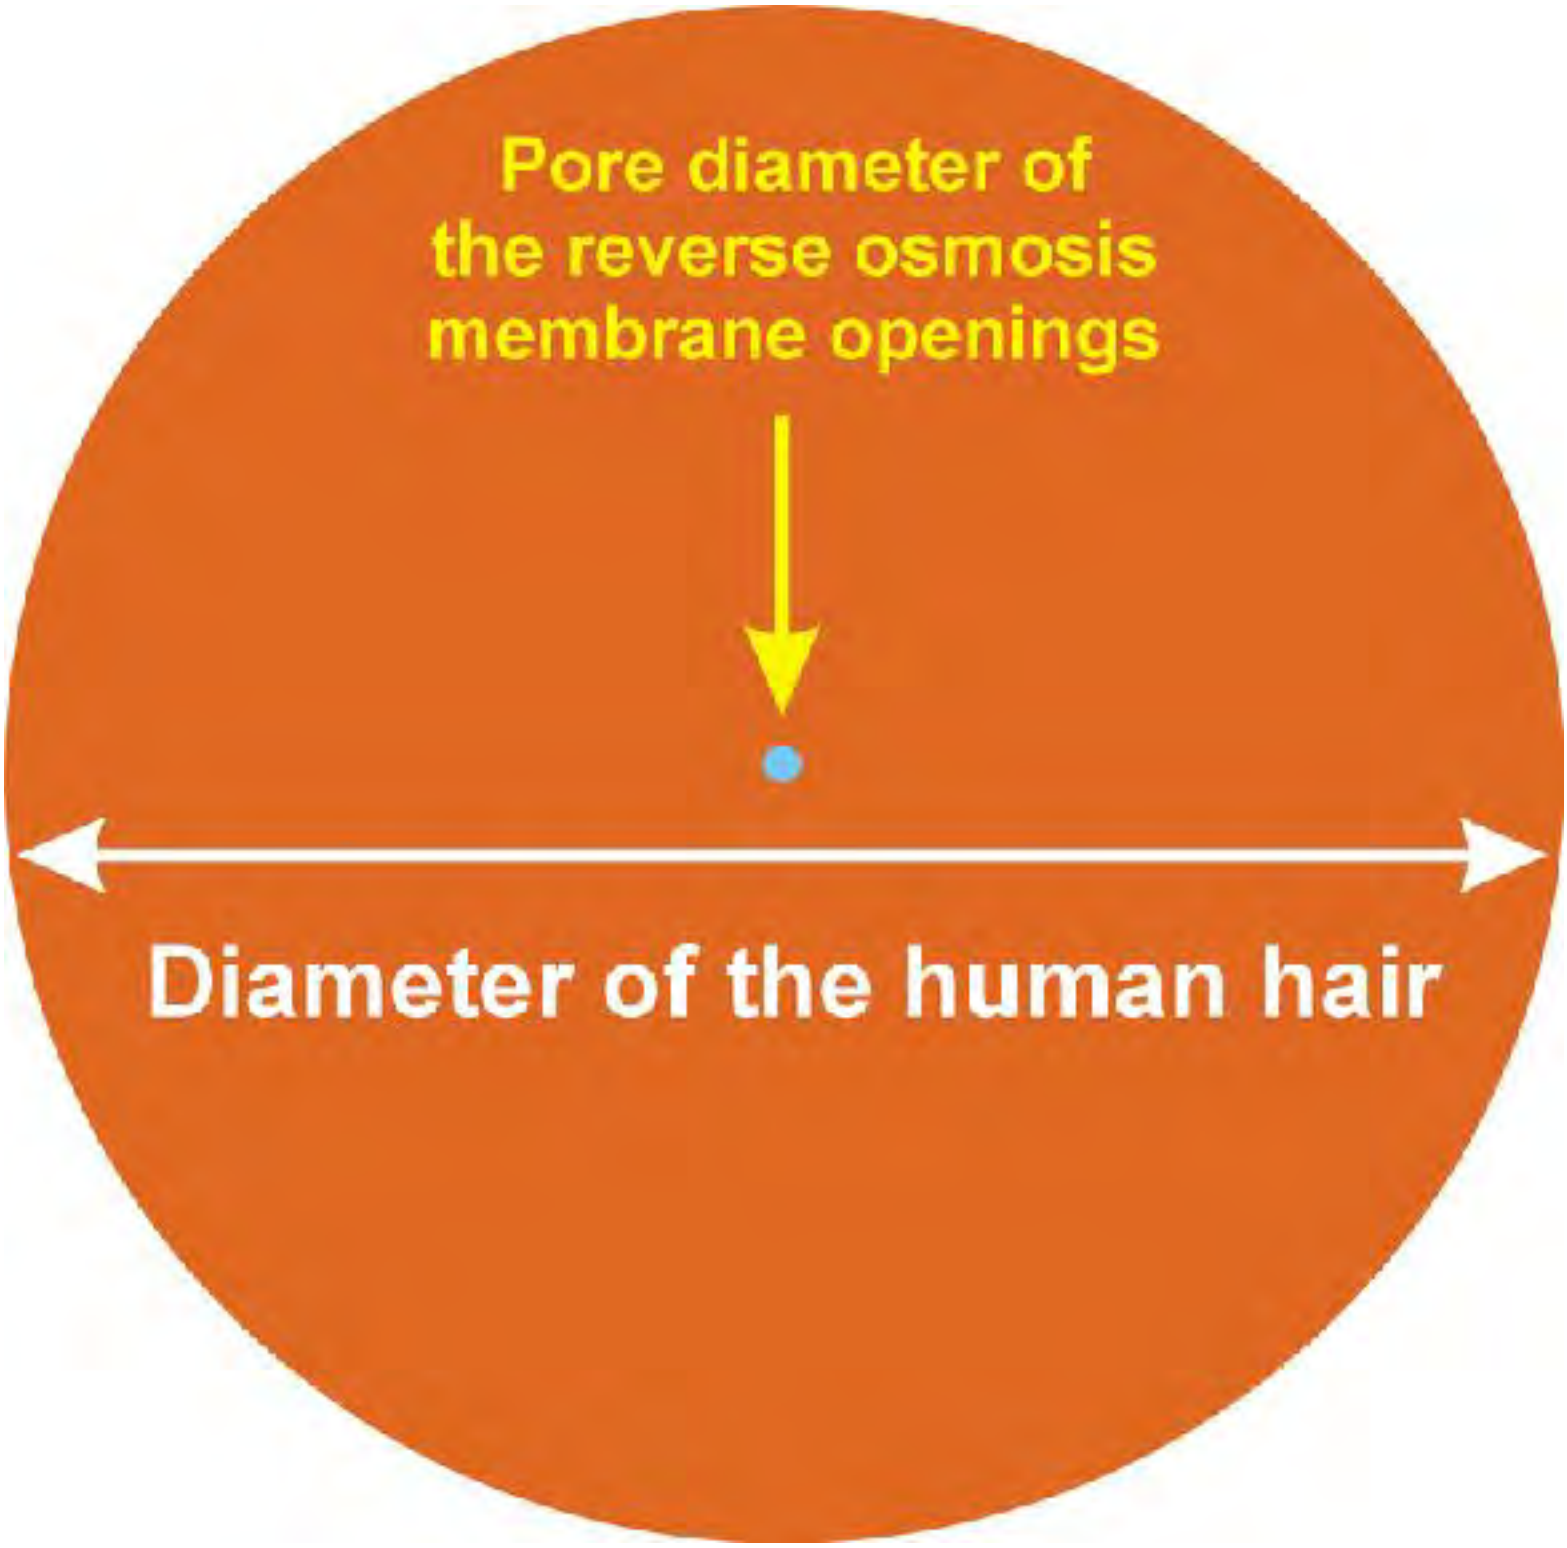
This membrane has the finest holes the world knows or at least I know of.

To my opinion the tiny pore size in the membrane cannot be achieved by regular physical means.

Perhaps the holes are created through laser technology but more likely through a penetration of radiation.

If this is the case the information / frequency of this radiation may be stored in the membrane.

This information / frequency of radiation may be consequently picked up by the water and stored in the water while penetrating these holes and may be consequently consumed.



Pore size in the membran
has a diameter of 0,1 Nanometer
= 1/10 of one millionth of a millimeter
= 1/10 of one millionth of 0.04 inches

Reason 8 Hexagonal Structure

Truly healthy water - the original pristine water we used to consume for some 50,000 years has what is called a “hexagonal structure”.
This hexagonal structure is what our body severely needs.

Hexa =Greek for 6.
Means the water crystals shows 6 spikes or edges.

RO technology destroys the healthy hexagonal water structure - see below.

This is an ideal hexagonal structure of a water crystal after the water is frozen.
One can clearly see the 6 spikes.

Dr Masaro Emoto

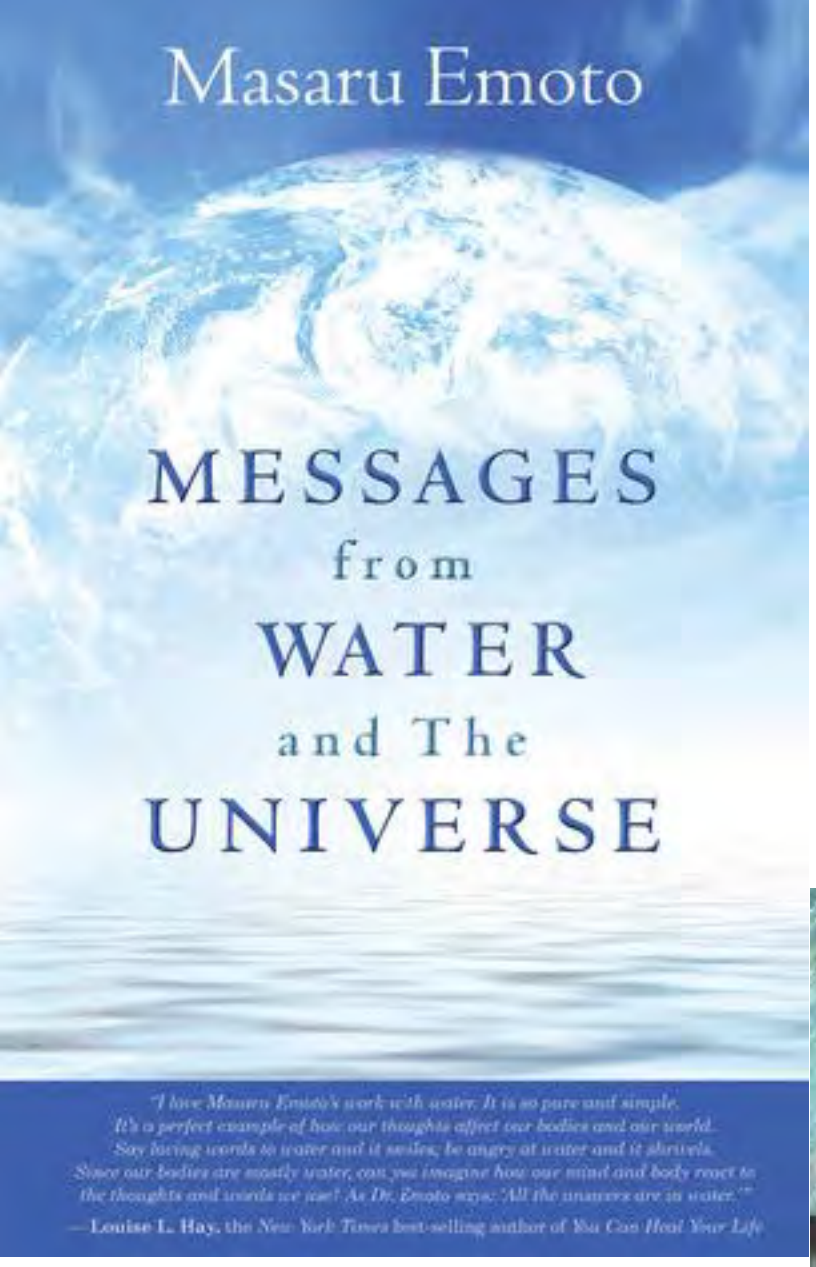
Japan

1943 - 2014

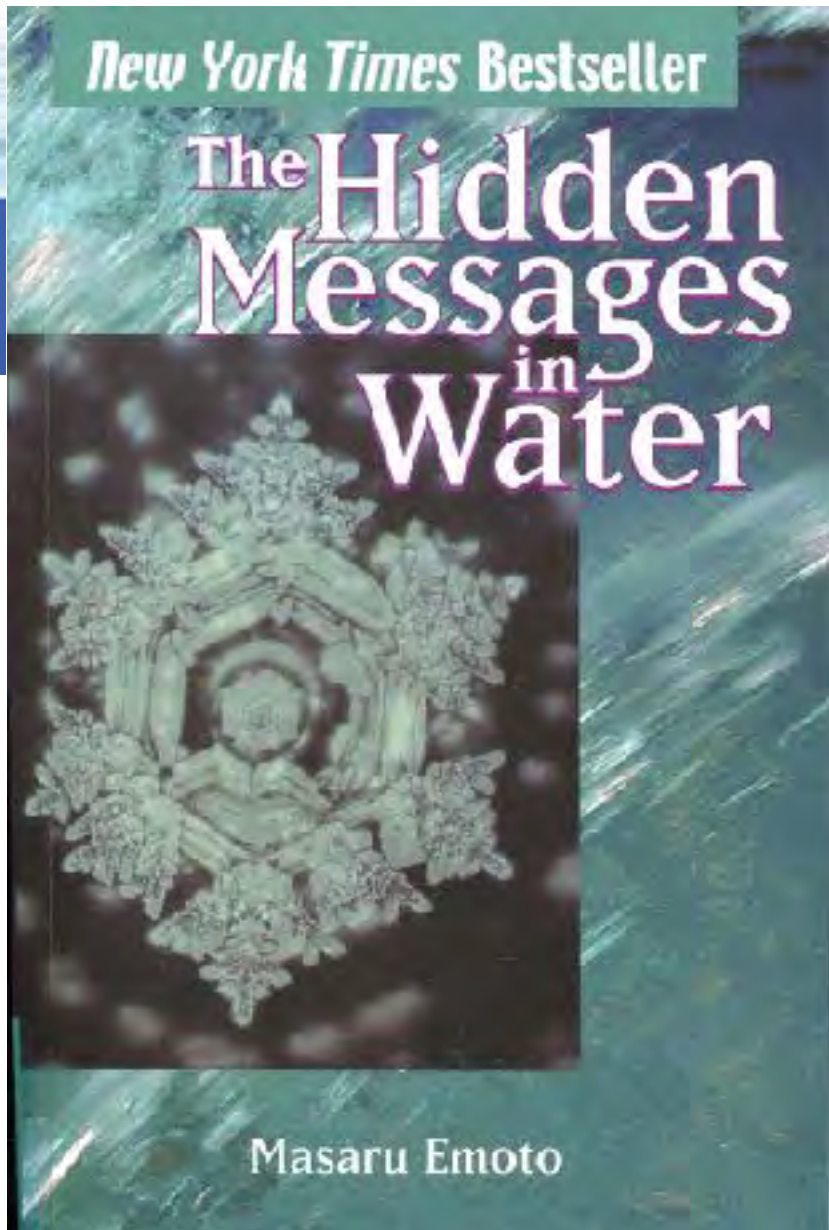
The work of Dr. Masaro Emoto shows how water stores and transmits all information within the body.

The water structure changes for the good or bad even through words, thoughts, symbols, signs, music.

See the following examples, read the 2 books I am pointing out, and please watch
Dr. Masaro Emoto
on YouTube.



Masaru Emoto
MESSAGES
from
WATER
and The
UNIVERSE
"I love Masaru Emoto's work with water. It is so pure and simple.
It's a perfect example of how our thoughts affect our bodies and our world.
Say loving words to water and it smiles; be angry at water and it shrivels.
Since our bodies are mostly water, can you imagine how our mind and body react to
the thoughts and words we use? As Dr. Emoto says: 'All the answers are in water.'"
— Louise L. Hay, the New York Times best-selling author of You Can Heal Your Life



New York Times Bestseller
The Hidden Messages in Water
Masaru Emoto

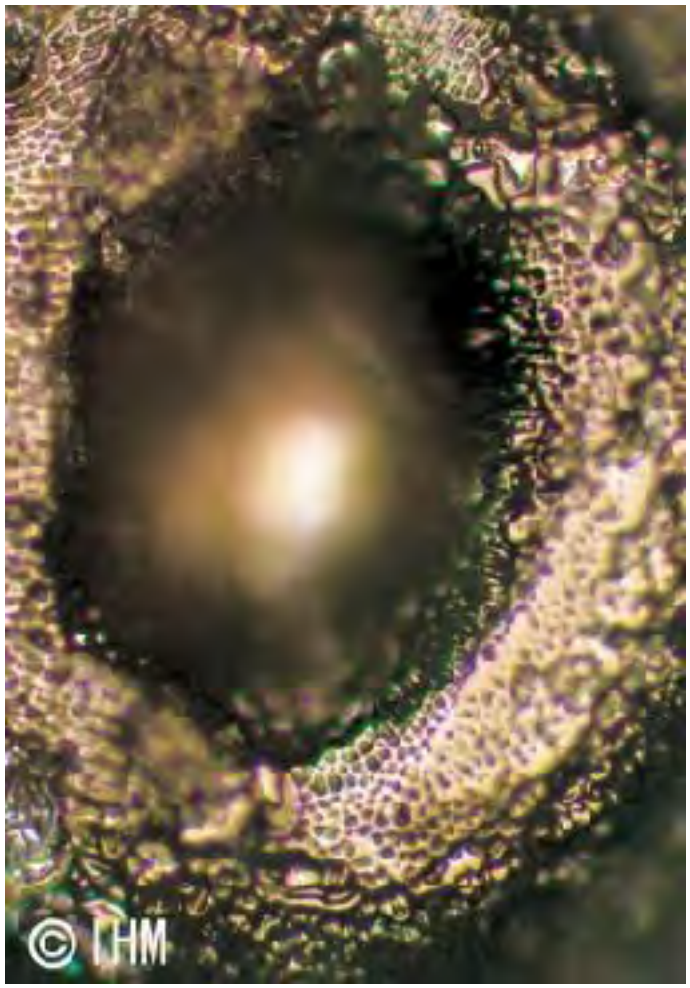
When you speak to water the words

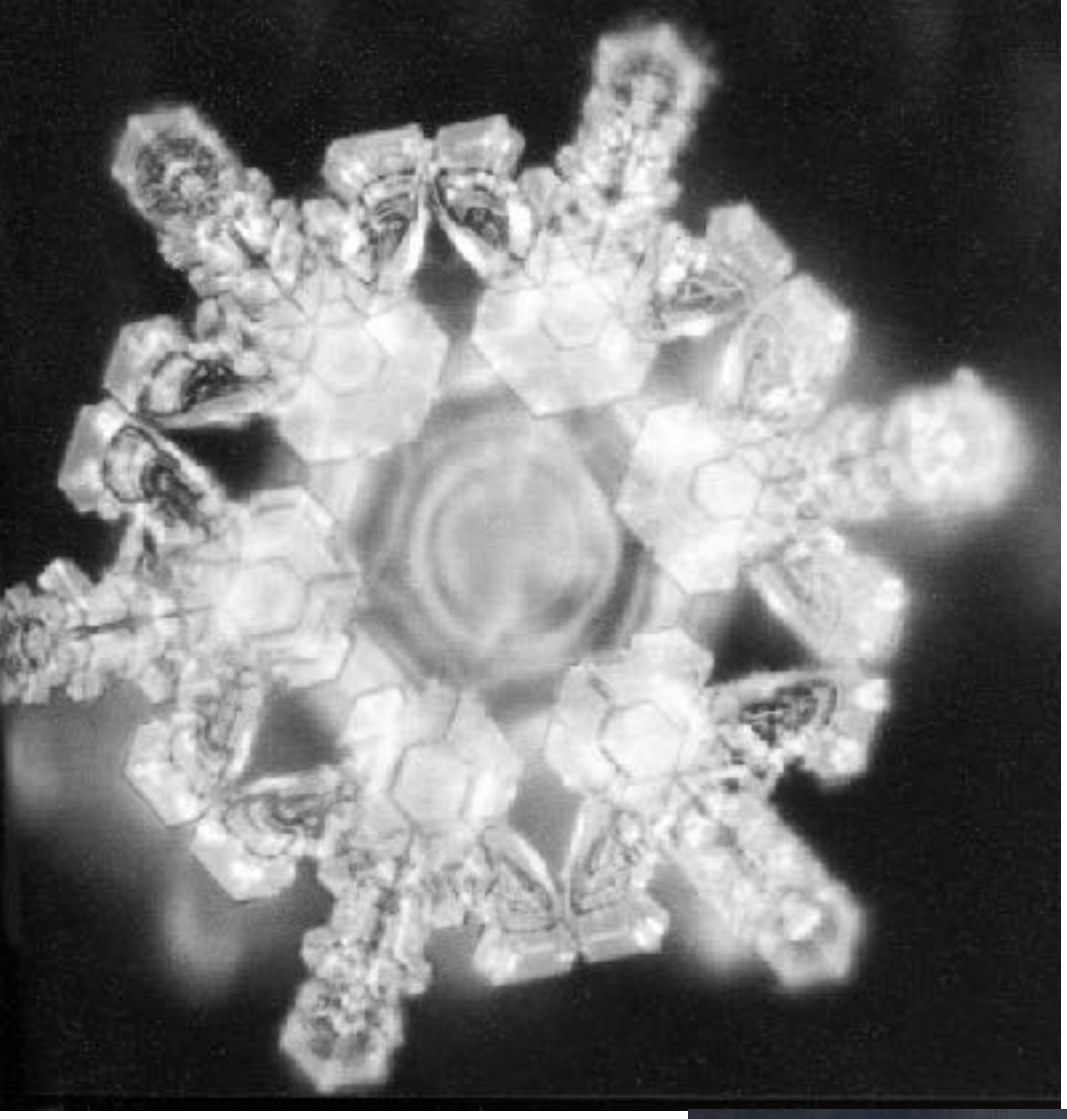
"Love & Gratitude"

When you speak to water the word

"Satan"

The water structure is destroyed.

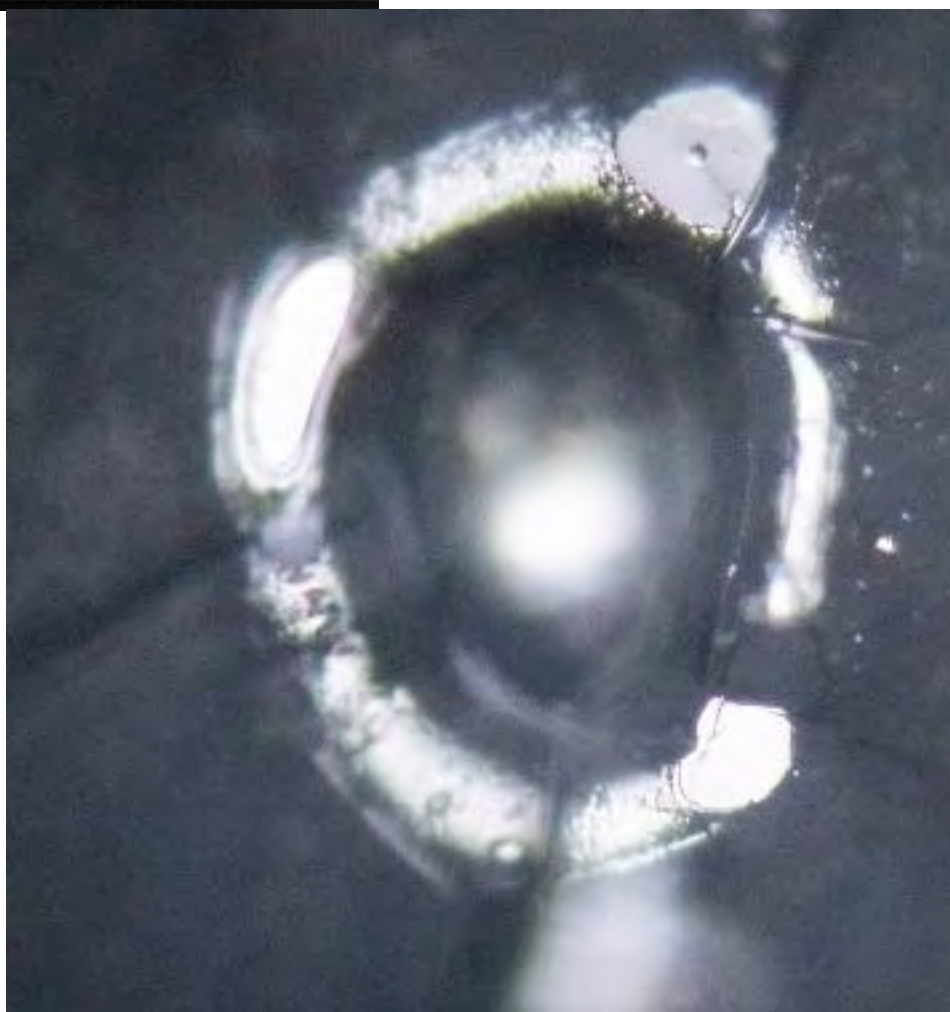




Healthy Water:

Hexagonale Structure

Destroyed water structure because of Reverse Osmosis Filters



DASANI

DASANI

Coca - Cola Admits That Dasani is Nothing But Tap Water

by Trevor Dalson

LONDON It made for great headlines, but the fact that the UK version of Coca Cola's Dasani brand bottled water comes out of the London public supply should hardly have come as a surprise.

"Coke's in hot water," "Eau dear" and "The real sting" were three good examples of the newspaper headline writer's art, but the only real difference between Dasani and many other bottled waters is that the humble origin of the product is firmly in the spotlight.

Figures from independent beverage research company Canadean show that at least two out of every five bottles of water sold around the world are, like Dasani, "purified" waters, rather than "source" waters which originate from a spring.

Most of the supermarket own-label bottled waters consist of treated mains water. They may be dechlorinated, filtered further, purified using ultraviolet light and have minerals either added or subtracted. They may also be carbonated.

In short, they are subjected to many of the same treatments that source waters undergo to satisfy public health requirements after being pumped up from the ground.

Alongside flagship brands such as Evian, Perrier, and Malvern, most of the big-name water producers market several purified water lines, often in countries where the safety of the public water supply is a concern.

Nestle's Pure Life is one such leading brand and PepsiCo's Aquafina is another, while

Doctors generally are clueless
When it comes to water.
They were never taught
about water in Med School.
I am not surprised.
Some doctors
even recommend
reverse osmosis water.
The question that remains for
me is:
Should this be considered
negligent
or reckless bodily harm?

To my personal opinion and experience and talking to many people over the years,
95% of the MD are a disgrace,
they can not think holistic and have no idea about water, electromagnetic radiation, basics of dentistry, nutrition.
3% of MD are good and 2% are fantastic.
I had the privilege to meet and work and still do with many of the 2% top doctors.

Summary

I gave you my opinions
supported by facts and 8 reasons
why I refuse
Reverse Osmosis Technology
and consequently
Reverse Osmosis Water.

RO Water is against nature
and against any reasoning.

To my opinion RO water harms everybody.

We do not live with nature but against it.

IPC

Norbert Heuser's solutions to rehabilitate Water.

The products developed by our IPC team were tested in a Masaro Emoto qualified laboratory.
It was impressively demonstrated
how our technology
MADE IN GERMANY
even rehabilitates destroyed Reverse Osmosis Water
into a healthy
hexagonal structure.
